# POLICE SERVICE OF NORTHERN IRELAND

## **ANNUAL REPORT OF THE CHIEF CONSTABLE AND ACCOUNTS 2010-11**

Presented to Parliament pursuant to Section 58 of the Police  
(Northern Ireland) Act 2000

## **Introduction by Chief Constable Matt Baggott**

As required by Section 58 of the Police (Northern Ireland) Act 2000, I have pleasure in submitting my second report as Chief Constable of the Police Service of Northern Ireland (PSNI). This relates to the financial year 2010-2011. The report will consist of a short synopsis of how our budget was used to deliver an impartial policing service to everyone in Northern Ireland, and our annually published statistics.

The past year represented an important milestone for policing in Northern Ireland, with the devolution of policing and justice in April 2010. Devolution has strengthened our Service and helped to ensure that the people of Northern Ireland receive the personal, professional and protective policing service that they deserve, and one which we are committed to delivering.

Sadly the terrorist threat has remained severe throughout the year. The tragic murder of our colleague Ronan Kerr in April was a reminder that some people remain wedded to the violence that the vast majority of people in Northern Ireland reject. Ronan represented all that is good in the police service, joining the PSNI to serve everyone with impartiality and courage. In the days and weeks after his murder, the public display of support for PSNI underlined how isolated the terrorists are. Colleagues in Districts, Operational Support and Crime Operations have worked tirelessly to counter the threat posed by terrorism. This work has continued to benefit from the tremendous co-operation enjoyed with colleagues in An Garda Síochána. The signing of a joint Cross Border Policing Strategy in December further cemented this partnership.

In the past year, we have continued our programme of change, with the aims of reducing serious harm, along with local issues, and improving the quality of service provided to local communities; whilst implementing the efficiencies required by a challenging 4 year budget settlement. During the past year, 611 additional officers were deployed in neighbourhood and response policing, as we continue to focus upon the development of personal policing across all 8 Districts. We have successfully rolled out mobile data for our patrol officers which, has added over 30 minutes of their time out of the station per shift. The introduction of discretionary disposals for more minor offences has resulted in satisfaction rates of over 90% amongst victims. Work to streamline justice, with the aim of providing visible and speedy resolution for the victims of crime continues in partnership with other criminal justice agencies.

Northern Ireland continues to experience lower levels of crime than elsewhere in the United Kingdom. There were 105,040 crimes recorded by the PSNI in 2010/11 compared with 109,139 in 2009/10, a decrease of 4,099 (-3.8%). This decrease in crime was reflected across all of the 8 policing Districts. It was also the lowest annual level of crime recorded by PSNI since the new Home Office counting rules were introduced in 1998/99.

Crime decreased in seven of the nine main offence categories (offences against the person, burglary, theft, fraud & forgery, criminal damage, offences against the state and other notifiable offences). The

two categories that showed an increase during 2010/11 were sexual offences, which showed an increase of 9.1% and robbery offences, which increased by 2.4%.

The overall detection (clearance) rate increased by 1.5 percentage points, from 25.8% in 2009/10 to 27.3% in 2010/11. Crime detection rates increased in eight of the nine main offence classes and decreased in one compared with the previous year.

There were 43 fewer persons killed (-42.6%) and a further 104 fewer persons seriously injured (-10.5%) on the roads during 2010/11 compared with the previous year. Over the last 10 years the number of persons killed on the roads has decreased steadily from 153 in 2001/02 to 101 in 2009/10. However, the drop to 58 fatalities in 2010/11 is quite unprecedented (-42.6%) and represents the lowest level of road fatalities recorded in a financial year since 1998/99 when the financial year reporting period was first introduced (calendar year road traffic fatality figures for Northern Ireland go back to 1931 with the lowest number recorded being for the 2010 calendar year when 55 persons were killed).

In last year's report, I wrote about the efforts to secure adequate funding in the context of significant public spending pressures. The importance of PSNI to the future of Northern Ireland has been recognised with the unprecedented funding provided by the Treasury and the Northern Ireland Executive over the next four years to address the current security situation. This £245m will be used to improve our operational capability. However, our four year main grant settlement remains challenging, and the Service Executive Board have begun to develop a four year efficiency plan to both deliver on the required savings, and also ensure that expenditure is focussed relentlessly upon service delivery.

The future of Northern Ireland has to be about mutual respect, education, economic development and an improved quality of life for those communities most in need. In the forthcoming year, PSNI will continue to provide an impartial, personal, professional and protective police service for all. We will work with partners to protect the most vulnerable; and to create the space for government, statutory agencies, and political leaders to develop a shared future for all.

**Matt Baggott**

Chief Constable

## Financial Report

### Police Recording of Crime – Definitions

Data Quality: The PSNI's statistics on recorded crime and detections are individually checked for compliance with Home Office Counting Rules by the PSNI's Central Statistics Branch. In addition, audits are conducted to ensure that crimes reported to the police are accurately recorded (i.e. to minimise the level of under or over recording of crime).

## **1. Recorded Crime**

### **Summary**

#### **Overall Crime – Number Recorded**

A total of 105,040 offences were recorded during 2010/11 compared with 109,139 in 2009/10, representing a decrease of 4,099 (-3.8%). This is also the lowest level of crime recorded since the revised Home Office Counting Rules were introduced in April 1998.

The months from November 2010 to February 2011 saw low crime levels, similar to those experienced during the same period in the previous financial year. The lowest monthly crime figure since the revised Home Office Counting Rules were introduced in April 1998 occurred during December 2010 when 7,354 crimes were recorded. Prior to that, the lowest monthly figure was 7,824 in January 2010. It should be noted that these low crime levels experienced over the last couple of years coincide with the more extreme weather conditions across Northern Ireland at those times.

The latest available police recorded crime figures for England and Wales (12 months to December 2010) show a fall of 6% in crime levels.

#### **Overall Crime – Detection Rate**

The overall detection rate during 2010/11 was 27.3%, 1.5 percentage points higher than that achieved in 2009/10.

The sanction detection rate has increased each year since 2001/02 when it stood at 11.3% to the current level of 27.3% (since 2007/08 both the sanction and overall detection rates have been effectively one and the same).

#### **Violent Crime - Overall**

Overall violent crime fell by 237 (-0.7%) from 33,100 to 32,863.

The violent crime detection rate increased from 34.1% to 36.9% (2.8 percentage points).

#### **Violent Crime - Offences against the person**

Offences against the person fell by 443 (-1.5%), while the detection rate rose by 3.1 percentage points from 35.4% to 38.5%.

There was an overall fall in the number of assaults. More serious assaults (wounding and GBH both with and without intent) fell by 183, AOABH fell by 150 and assaults without injury (common/aggravated assault) fell by 364. However the number of offences of assault on police increased by 222.

#### **Violent Crime - Sexual offences**

Sexual offences increased by 176 (9.1%) from 1,944 to 2,120. The detection rate increased by 0.9 percentage points.

Rape offences (including attempts) rose by 89 (19.3%) from 461 to 550, while offences of sexual assault/sexual activity rose by 77 (7.9%) from 974 to 1,051. PSNI are continuing to take steps to improve the recording of sexual offences, and of rape offences in particular, which may account for some of this increase.

#### **Violent Crime – Robbery**

Robbery increased by 30 offences (2.4%) from 1,276 to 1,306. The robbery detection rate increased by 1.3 percentage points to 19.9%.

Ordinary robbery rose by 22 (3.7%) while armed robbery rose by 5 (0.9%).

## **Burglary**

Overall, burglary offences fell by 642 (-5.1%). Domestic burglary fell by 189 (-2.6%) with non-domestic burglary falling by 423 (-8.1%).

The detection rate for domestic burglary decreased slightly from 10.0% to 9.7%, while the detection rate for non-domestic burglary rose from 12.1% to 13.2%.

## **Theft**

Theft offences fell by 1,168 (-4.4%), with decreases across all theft categories apart from other theft which increased by 699 (7.8%) and theft of pedal cycles which rose by 50 (5.1%). Vehicle crime fell by 924 (-13.2%), shoplifting fell by 383 (-5.7%) and vehicle tampering/interference fell by 363 (-29.6%).

The detection rate for all theft offences decreased from 23.1% to 22.4%. However the vehicle crime detection rate showed an increase of 2.3 percentage points.

## **Criminal Damage**

Offences of criminal damage fell by 1,447 (-5.5%) and the level now stands at 25,003.

Within this class the fall in the number of criminal damage/malicious damage offences contributed most to this decrease with 1,329 fewer offences recorded during 2010/11, a fall of 5.6%. There was an increase in the number of explosives offences, from 23 to 55.

The detection rate for all criminal damage offences rose from 12.3% to 12.9%.

## **Fraud and Forgery**

Fraud and forgery offences fell by 320 (-9.5%).

There were decreases across all fraud & forgery categories with the exception of deception which showed an increase of 177 (15.4%). The largest fall was in offences of making off without payment which decreased by 356 (-20.8%).

The detection rate for fraud and forgery offences rose from 23.6% to 33.3%.

## **Offences Against the State**

Offences against the State decreased by 245 (-16.5%).

The detection rate for offences against the state rose from 48.9% to 56.8%.

## **Other Notifiable Offences**

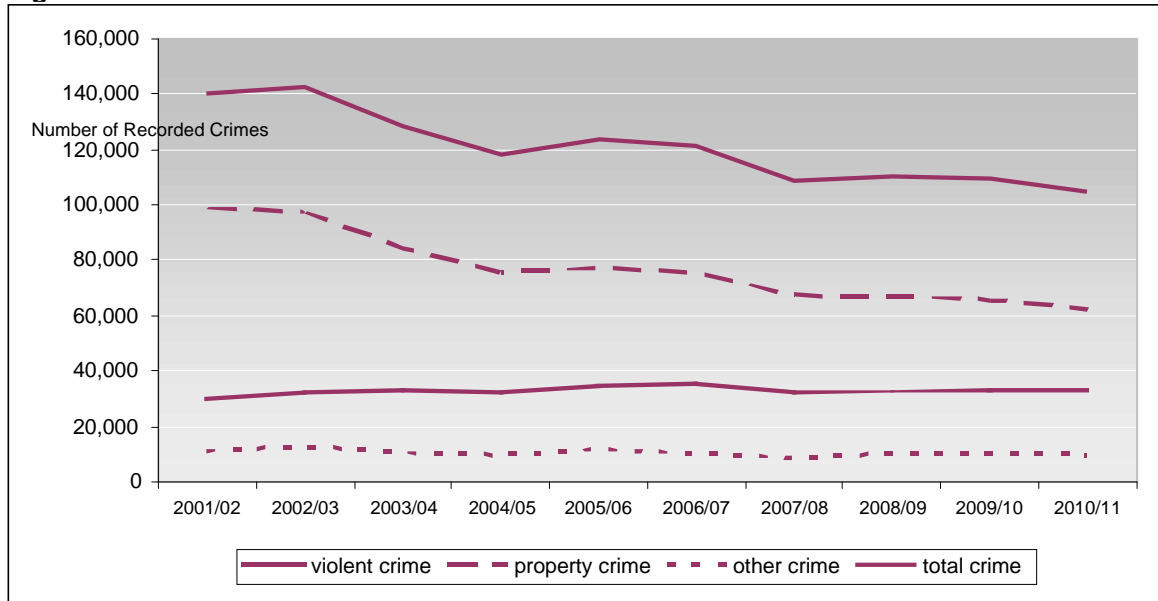

Other notifiable offences showed little change overall with a fall of 40 (-0.7%).

Drug offences increased by 10.7%, with non trafficking offences showing a rise of 245 (9.9%) and trafficking offences increasing by 91 (13.6%). Dangerous driving offences fell by 166 (-19.2%) and breach of orders fell by 170 (-13.7%).

The detection rate for other notifiable offences rose from 80.4% to 81.9%.

<sup>1</sup> An explanation of the change in detection rates when comparing 2006/07 onwards with previous years is provided on page 15.

## **Definitions**

### **Recorded Crime**

Police recorded crime statistics (sometimes referred to as notifiable offences) detail those crimes and offences (including attempts) recorded by the police which are deemed to be indictable or triable eitherway. Certain closely associated summary offences are also counted in the recorded crime figures.

### **Indictable offences**

Those more serious crimes which are tried on indictment in the Crown Court by a judge and jury;

### **Triable-either-way offences**

Those offences which, under certain circumstances, are triable either summarily in a magistrates court or on indictment in the Crown Court;

### **Summary offences**

Less serious and are tried in a Magistrates Court before a resident magistrate with no jury.

The number of crimes recorded by the police is dependent on two factors:

- Whether the victim or a representative of the victim brings that crime to the attention of the police or on the crime coming to the attention of the police through some other means (such as the police officer being present at the time);
- Whether that incident is determined as being a recordable offence within the categories laid down by the Home Office in the official counting rules.

## **Detections**

Detections (or clearances as they may alternatively be known) are, broadly speaking, those crimes that have been 'cleared up' by the police. Crimes are counted as 'detected or cleared' in accordance with strict counting rules issued by the Home Office. They are counted on the basis of crimes rather than offenders. For example, if six offenders are involved in a robbery and are all arrested and charged, then this will count as a single detection (i.e. the robbery is deemed to be 'detected'). Alternatively if only one of the six is identified and charged while the other five remain unidentified and at large, this also means that the robbery can still be deemed as 'detected'.

The following methods of detection involve a formal sanction:

- Charging or issuing a summons to an offender;
- Issuing a caution to the offender;
- Having the offence accepted for consideration in court;
- The offender is a juvenile who is dealt with by means of an informed warning, restorative caution or prosecutorial diversion.

In addition, for the most serious offence types ('indictable only' – see recorded crime paragraph above for explanation) a non sanction detection can be claimed if:

- The Public Prosecution Service (PPS) directs no prosecution; or
- The case cannot proceed because the offender has died.

## **Recent Changes in the Recording of Detections**

Prior to April 2006 a variety non sanction detections could be claimed where police took no further action, the main one being where the victim declined to prosecute. At that time these detection types accounted for around 50% of the PSNI's total detection rate. However, since then some major changes have been introduced which have substantially limited the detection options open to the PSNI.

In April 2006, a higher evidential standard was adopted within the PSNI following the establishment of the Public Prosecution Service in Northern Ireland. Then in April 2007 the Home Office significantly restricted the detection types available to the police, which meant that virtually all non sanction detections could no longer be claimed as a valid detection. Both of these changes had the impact of greatly reducing the number of non sanction detections to such an extent that the PSNI overall detection rate and its sanction detection rate and now virtually one and the same (only a very small proportion of non sanction detections are now claimed each year).

### **Violent Crime**

Violent crime comprises three main offence groupings:

- Offences Against the Person
- Sexual Offences; and
- Robbery

What violent crime offences have in common is that they involve actual violence or the threat of violence. The degree of violence varies considerably, even between incidents in the same classification.

The large majority of incidents categorised as violent crime do not actually involve any significant injury to the victim, although some of the crimes not resulting in injury may still be traumatic for their victims, for example, threats to kill.

## 2. Domestic Abuse Incidents and Crimes

### Summary

Table 2.1	Domestic Abuse Motivation - Incidents, Crimes and Detections Summary 2009/10 and 2010/11
Table 2.2	Domestic Abuse Motivation: Incidents, Recorded Crimes and Detections by District 2009/10 and 2010/11
Table 2.3	Recorded Crimes with a Domestic Abuse Motivation: Gender and age of victims by District 2009/10 and 2010/11
Table 2.4	Domestic Abuse Motivation: Incidents, Recorded Crimes and Detections by Area 2009/10 and 2010/11
Table 2.5	Recorded Crimes with a Domestic Abuse Motivation: Gender and age of victims by Area 2009/10 and 2010/11
Table 1.6	Domestic Abuse – Definition

Data Quality: The PSNI's statistics on incidents and crimes with a domestic abuse motivation are derived from a motivation 'tick box' contained in the Occurrence Management Form which has to be completed by a police officer or member of police staff for each such reported incident/crime. The correct application of a domestic abuse motivation for all such incidents/crimes is not quality assured by the PSNI's Central Statistics Branch, but quarterly audits are conducted to ensure that any under or over-recording is corrected.

## 2. Domestic Abuse Incidents and Crimes

### Summary

#### Incidents

Between 2009/10 and 2010/11 the number of domestic abuse incidents decreased by 1,797 (-7.3%), making 2010/11 the second lowest level of domestic abuse incidents recorded since the data series started in 2004/05. The lowest number of domestic abuse incidents recorded was in 2004/05 (20,959) while 2009/10 showed the highest level recorded, at 24,482.

#### Recorded Crimes

There were 9,546 crimes with a domestic abuse motivation recorded in 2010/11, which is a fall of 357 (-3.6%) on 2009/10. The number of crimes with a domestic abuse motivation has ranged from a low of 8,508 in 2004/05 to a high of 10,768 in 2005/06.

There were 7 murders with a domestic motivation recorded during 2010/11, the same as the number recorded in 2009/10.

#### Detection Rates

The overall detection rate for crimes with a domestic abuse motivation in 2010/11 was 46.6%, 3.3 percentage points higher than in 2009/10.

As there have been a number of changes in the recording of detections since 2004/05, only the sanction detection rate is comparable across the whole of this data series. The sanction detection rate for domestic abuse crimes has increased year on year from a rate of 14.4% in 2004/05 to the current rate of 46.6% in 2010/11.

**Table 2.1: Domestic Abuse Motivation: Incidents, Crimes and Detections Summary 2009/10 and 2010/11**

	2009/10	2010/11	change

<sup>2</sup> The domestic abuse offence figures shown above do not include assault on police.

## **Definitions**

The Northern Ireland Regional Steering Group on Domestic Violence has defined domestic abuse as 'any incident of threatening behaviour, violence or abuse (psychological, physical, verbal, sexual, financial or emotional) inflicted on one person by another where they are or have been intimate partners or family members, irrespective of gender or sexual orientation', where:

### **Incident**

Means an incident anywhere and not confined to the home of one of the partners/family members;

### **Intimate partners**

Means there must have been a relationship with a degree of continuity and stability. The relationship must also have had (or reasonably supposed to have had) a sexual aspect, such as in the relationship between husband and wife or between others generally recognised as a couple including same sex couples; and

### **Family members**

Includes mother, father, son, daughter, brother, sister, grandparents, whether directly or indirectly related, in-laws or stepfamily.

A crime will be recorded as domestic abuse where it meets the definition provided above. Not all domestic abuse incidents will result in the recording of a crime. Domestic abuse crimes are classified according to the Home Office Counting Rules and form a subset of the overall police recorded crime statistics. Further details of the background and recording practice in relation to police recorded crime statistics are available in the bulletin 'Police Recorded Crime in Northern Ireland 2010/11'.

#### Hate Motivation Definitions

Data Quality: The PSNI's statistics on incidents and crimes with a hate motivation are derived from a motivation 'tick box' contained in the Occurrence Management Form which has to be completed by a police officer or member of police staff for each such reported incident/crime. The correct application of a hate motivation for all such incidents/crimes is not quality assured by the PSNI's Central Statistics Branch, but quarterly audits are conducted to ensure that any under or over-recording is corrected.

### 3. Hate Incidents and Crimes

#### Summary

Any incident, which may or may not constitute a criminal offence, which is perceived by the victim or any other person, as being motivated by prejudice or hate (ACPO Definition).

A full definition for each type of hate motivation is included at the end of this section.

**Table 3.1: Incidents, Crimes and Detections with a Hate Motivation Summary 2009/10 and 2010/11**

Motivation	Total number of incidents		Total number of crimes		Total number of crimes detected		Detection rate (%)		
	2009/10	2010/11	2009/10	2010/11	2009/10	2010/11	2009/10	2010/11	% point change <sup>1</sup>
<b>Racist</b>	1,038	842	712	531	115	71	16.2	13.4	-2.8
<b>Homophobic</b>	175	211	112	137	21	24	18.8	17.5	-1.2
<b>Faith/Religion</b>	23	21	15	17	1	0	6.7	0.0	-6.7
<b>Sectarian</b>	1,840	1,437	1,264	995	213	287	16.9	28.8	12.0
<b>Disability</b>	58	38	41	31	6	4	14.6	12.9	-1.7
<b>Transphobic</b>	14	22	4	8	0	1	0.0	12.5	12.5

<sup>1</sup> While the detection rates are rounded to one decimal place, the detection rate change in % pts is calculated on the unrounded detection rates and then rounded to one decimal place.

#### Incidents

When compared with 2009/10 the number of homophobic incidents in 2010/11 increased by 36 (20.6%) and transphobic incidents rose by 8. By contrast, during the same period, sectarian incidents fell by 403 (-21.9%), racist incidents decreased by 196 (-18.9%), disability incidents by 20 (-34.5%) and faith/religion incidents fell by 2.

At 1,437, this is the lowest level of sectarian motivated incidents recorded since the series began in 2005/06.

While the levels of faith/religion and disability motivated incidents are also the lowest recorded since each data series began in 2005/06, increasingly rigorous data checks have been carried out on the application of the motivations for these incidents, to ensure that the definition is being clearly adhered to. These improvements will have had an impact in reducing the levels of these incidents recorded in more recent years.

#### Recorded Crime

Between 2009/10 and 2010/11 the number of crimes with a homophobic motivation increased by 25 (22.3%), transphobic crimes increased by 4 and faith/religion motivated crimes increased by 2. However the number of crimes with a sectarian motivation fell by 269 (-21.3%), those with a racist motivation fell by 181 (-25.4%) and those with a disability motivation fell by 10.

The number of racist motivated crimes recorded during 2010/11 is the lowest since the data series began in 2004/05, while the number of sectarian crimes has fallen below 1,000 for the first time since the data series began in 2005/06.

## Detection Rates

During 2010/11 there were increases in the detection rates recorded for sectarian and transphobic motivated crimes, which increased by 12.0 percentage points and 12.5 percentage points respectively. The sectarian detection rate of 28.8% is the highest achieved since the data series began in 2005/06.

During the same period, there were no faith/religion motivated crimes detected, resulting in the detection rate fall from 6.7% to 0.0%. The racist detection rate decreased by 2.8 percentage points (from 16.2% to 13.4%), the disability detection rate fell by 1.7 percentage points (from 14.6% to 12.9%) and the detection rate for homophobic motivated crimes decreased from 18.8% to 17.5% (-1.2 percentage points).

## Transphobic Motivations

There were 22 transphobic incidents recorded during 2010/11, 8 more than were recorded during 2009/10. There were 13 incidents recorded in B District, 3 in D District, 2 in E District and 1 each in A District, F District, G District and H District.

The number of crimes with a transphobic motivation increased from 4 in 2009/10 to 8 in 2010/11.

In 2010/11 there was one crime with a transphobic motivation detected giving a detection rate of 12.5%, compared with no offences detected during 2009/10.

## Attacks on Symbolic Premises

Attacks on symbolic premises are recorded where a crime has a sectarian motivation, where the premises is the intended target of the attack, and where the premises are one of the following; a church or chapel, a GAA or Ancient Order of Hibernians Hall, an Orange Hall or Apprentice Boys Hall, or a school. These figures are a subset of sectarian motivated crimes and date back to 2007/08.

Figures for 2010/11 are lower than those for 2009/10 for each category of symbolic premises.

**Table 3.2: Attacks on Symbolic Premises 2007/08 to 2010/11<sup>1</sup>**

Type of Symbolic Premises	2007/08	2008/09	2009/10	2010/11
Church or Chapel	19	37	24	23
GAA or Ancient Order of Hibernians Hall	6	10	15	8
Orange or Apprentice Boys Hall	63	61	72	58
School	6	13	15	*

<sup>1</sup>Cell suppression has been applied to ensure that the identity of individuals/organisations or any private information relating to them is not revealed.

## **Definitions**

### **Racist**

A racist incident is defined as any incident which is perceived to be racist by the victim or any other person. A racial group can be defined as a group of persons defined by reference to race, colour, nationality or ethnic or national origins (this includes UK National origins i.e. Scottish, English, Welsh and Irish) and references to a person's racial group refer to any racial group into which he/she falls. Racial group includes the Irish Traveller community.

### **Homophobic**

A homophobic incident is defined as any incident which is perceived to be homophobic by the victim or any other person. Homophobia can be defined as a fear or dislike directed towards lesbian, gay or bisexual people, or a fear or dislike directed towards their perceived lifestyle, culture or characteristics.

### **Sectarian**

A sectarian incident is defined as any incident which is perceived to be sectarian by the victim or any other person. The term 'sectarian', whilst not clearly defined, is a term almost exclusively used in Northern Ireland to describe incidents of bigoted dislike or hatred of members of a different religious or political group. It is broadly accepted that within the Northern Ireland context an individual or group must be perceived to be Catholic or Protestant, Nationalist or Unionist, or Loyalist or Republican.

### **Faith/Religious**

A faith/religious incident is defined as any incident which is perceived to be based upon prejudice towards or hatred of the faith of the victim or so perceived by the victim or any other person. A faith or religious group can be defined as a group of persons defined by reference to religious belief or lack of religious belief. This would include Christians, Muslims, Hindus, Sikhs and different sects within a religion. It also includes people who hold no religious belief at all.

### **Disability (or Disablist)**

A disability related incident is defined as any incident which is perceived to be based upon prejudice towards or hatred of the victim because of their disability or so perceived by the victim or any other person. Disability can be defined as any physical or mental impairment which has substantial and long-term adverse effect on a person's ability to carry out normal day to day activities.

### **Transphobic**

A transphobic incident is defined as any incident which is perceived to be transphobic by the victim or any other person. Gender should not be confused with sexual orientation. A transsexual is a person who has 'gender dysphoria' or dissatisfaction with his or her own birth gender. Transsexuals may be lesbian, gay, bisexual or heterosexual and may or may not consider an incident perpetrated against them to be homophobic.

## 4. Drug Seizures and Arrests

### Summary

Table 4.1	Drug Seizures and Arrests 2008/09 to 2010/11
Table 4.2	Seizure Incidents and Arrests by District and Area 2009/10 to 2010/11

Data Quality: The PSNI's statistics on the drug seizures are collated by the PSNI's Central Statistics Branch and are based on paper returns that are completed by police officers when they make a drug seizure. The statistics are checked for completeness with local Districts and with the PSNI Organised Crime Branch and are also cross-referenced against other internal records of drug seizures.

## 4. Drug Seizures and Arrests

### Summary

#### Overview

There were a total of 3,564 drug seizure incidents recorded in 2010/11 representing a 7.4% increase on the 3,319 seizure incidents made in 2009/10. As with previous years cannabis was the drug most commonly seized.

There were fewer class A seizures incidents made during this period in comparison to the previous year (decreasing by 28.9% from 793 in 2009/10 to 564 in 2010/11).

Seizure incidents of Class B drugs have increased, rising from 2,630 class B seizures made in 2009/10 to 3,050 in 2010/11. This can be partially explained due to the classification of mephedrone which was made illegal from the 16<sup>th</sup> April 2010.

There was an 8.2% increase in drug arrests between 2009/10 and 2010/11 increasing from 2,250 persons arrested in 2009/10 to 2,435 persons arrested in 2010/11.

#### Class A Seizures

Cocaine accounted for the greatest number of class A seizure incidents although the amount of cocaine powder seized decreased from 27.5 kilograms in 2009/10 to 7.8 kilograms in 2010/11.

The number of seizure incidents of ecstasy tablets fell from 204 in 2009/10 to 150 in 2010/11 as did the quantity of ecstasy tablets seized which decreased from 54,434 tablets in 2009/10 to 14,774 in 2010/11.

Despite a seizure in August 2010 of just over 2 kilograms of heroin powder in the Newry & Mourne Area, the amount of opiate powder seized decreased from 8.6 kilograms in 2009/10 to 4.6 kilograms in 2010/11.

#### Class B Seizures

There were 291 seizure incidents of mephedrone in 2010/11 resulting in seizures of 104 mephedrone wraps and 20.9 kilograms of mephedrone powder throughout the year.

The number of seizure incidents of amphetamine powder remained fairly constant (128 in 2010/11 compared with 129 in 2009/10) but the amount seized dropped from 95.0 kilograms to 11.2 kilograms as did the number of amphetamine tablets which fell from 5,821 to 411.

There were 2,727 seizure incidents of cannabis in 2010/11 compared with 2,523 seizure incidents in 2009/10 representing an 8.1% increase. However, the quantity of cannabis resin and herbal cannabis seized was lower in 2010/11 than in 2009/10.

Herbal cannabis accounted for the greatest number of cannabis seizure incidents. The number of seizure incidents of herbal cannabis increased by 14.6% from 1,434 in 2009/10 to 1,644 seizure incidents in 2010/11.

The number of cannabis plants seized almost doubled increasing from 5,484 plants in 2009/10 to 10,330 plants in 2010/11.

<sup>1</sup>Cannabis was reclassified on the 26<sup>th</sup> January 2009 from Class C to Class B. The Class B total includes those cannabis seizures after reclassification.

<sup>2</sup>As seizure incidents can involve more than one drug type, seizure figures for individual drugs cannot be added together to produce totals.

<sup>3</sup>Total seizure incidents include drugs not presented in this table such as benzodiazepines (diazepam, temazepam and nitrazepam), ketamine, piperazines and steroids.

## 5. Statistics Relating to the Security Situation

### Summary

#### Deaths due to the Security Situation

During 2010/11 there was one security related death, one fewer than in the previous year. With 2007/08, this is the lowest number of security related deaths recorded in a single year since police records began in 1969.

#### Shooting Incidents

The number of shooting incidents decreased from 79 in 2009/10 to 72 in 2010/11.

Of the 72 shooting incidents recorded in 2010/11, 61 were attributed to Republicans (this includes 31 paramilitary-style shooting incidents) and 3 were attributed to Loyalists. In the remaining 8 incidents, attribution could not be determined.

There were 7 shooting incidents involving shots fired at police. Five of these incidents occurred during July 2010 when shots were fired at Crossmaglen and Lurgan police stations and in three serious public disorder incidents between the 12<sup>th</sup> and 13<sup>th</sup> July. Shots were also fired at police during public disorder in Lurgan in August 2010 and in Londonderry in March 2011. All these incidents were attributed to Republicans.

#### Bombing Incidents

There was a marked increase in the number of bombing incidents from 50 in 2009/10 to 99 in 2010/11. This is the highest number recorded in 8 years, although it's significantly lower than the 2001/02 figure in which there were 318 bombing incidents.

The 99 bombing incidents recorded in 2010/11 involved 101 devices. Of the 101 devices, 52 exploded and 49 were defused. Injuries were reported on 6 occasions when a device exploded.

Pipe bombs were the most frequent device used, being involved in 64 bombing incidents. There were also 4 incidents in which a viable device was located under a vehicle.

Of the 99 bombing incidents, 59 were attributed to Republicans and 28 were attributed to Loyalists with the attribution of the remaining 12 not determined.

There were 26 bombing incidents involving attacks on the security forces. Included within these were 11 attacks on police officers and 12 attacks on police stations. The other three incidents were attacks on army premises and personnel.

#### Paramilitary-style Attacks

During 2010/11 there were 83 casualties as a result of paramilitary-style attacks (i.e. both shootings and assaults), compared with 127 casualties recorded in the previous year.

Paramilitary-style **shootings** accounted for 33 casualties, all of which were attributed to Republicans.

Paramilitary-style **assaults** accounted for the remaining 50 victims with 34 of such assaults attributed to Loyalists and 16 to Republicans.

In comparison with the previous year, the number of casualties of paramilitary-style shootings decreased by 13 while the number of casualties of paramilitary-style assaults decreased by 31.

#### Firearms, Ammunition and Explosives Finds

There were 86 firearms and 2,574 rounds of ammunition found during 2010/11. In addition, 2.9kg of explosives were recovered during the year.

### **Persons Arrested under Section 41 of the Terrorism Act and subsequently Charged**

In 2010/11, a total of 188 persons were arrested under section 41 of the Terrorism Act (an 11.2% increase from the 169 recorded last year). Forty persons were subsequently charged.

### Reported Injury Road Traffic Collisions – Definitions

Data Quality: The PSNI's road traffic statistics are collated by the PSNI's Central Statistics Branch. The figures include only those injury collisions that are brought to the attention of the police. These statistics are produced to high professional standards as set out in the Code of Practice for Official Statistics.

## 6. Reported Injury Road Traffic Collisions and Casualties

### Summary

During 2010/11 there were 5,547 injury road traffic collisions. These collisions resulted in 8,796 casualties, of which 58 were killed, 891 were seriously injured and 7,847 were slightly injured. Compared with 2009/10 there were 43 fewer fatalities in 2010/11 (down 42.6%) and there were 104 fewer people seriously injured (down 10.5%).

There was a 10% decrease in the number of recorded collisions in 2010/11 compared with 2009/10 and this was generally reflected across the full 12 month period. However, the decrease was even more marked in December 2010 which coincided with a prolonged cold spell experienced at this time, when 402 injury collisions were recorded, 29% fewer than for the same month the previous year.

There has been a general downward trend in the number of fatal and seriously injured casualties over the last 10 years. When the figures for 2010/11 are compared with those recorded a decade ago in 2001/02, fatalities have decreased by 62% and the number of those seriously injured has decreased by 46%.

### Collisions

The total number of injury road traffic collisions decreased from 6,187 in 2009/10 to 5,547 in 2010/11 (a decrease of 10.3%). The number of collisions resulting in individuals being killed or seriously injured fell by 10.5% (883 in 2009/10, 790 in 2010/11).

The total number of injury road traffic collisions involving child casualties decreased from 748 in 2009/10 to 691 in 2010/11 (a decrease of 7.6%). The number of collisions resulting in a child being killed or seriously injured decreased by 5.7% (106 in 2009/10, 100 in 2010/11).

The most common causes of injury road traffic collisions in 2010/11 were 'inattention or attention diverted' (913 collisions), 'driving too close' (520 collisions) and 'excessive speed having regard to conditions' (428 collisions).

The most common causes of fatal and serious injury road traffic collisions in 2010/11 were 'excessive speed having regard to conditions' (84 collisions), 'inattention or attention diverted' (81 collisions) and 'impaired by alcohol – driver/rider' (72 collisions).

### Casualties

Overall there was a 9.1% decrease in casualties resulting from injury road traffic collisions (from 9,675 in 2009/10 to 8,796 in 2010/11).

Drivers of motor vehicles were the single largest casualty class in 2010/11, accounting for just over half (51.9%) of all casualties, followed by passengers (32.0%), pedestrians (8.4%), motorcyclists (4.3%) and pedal cyclists (2.4%).

Casualties aged 16 – 24 had the largest proportionate decrease compared with all age groups from 2,731 in 2009/10 to 2,334 in 2010/11 (a decrease of 14.5%). The 45 – 54 age group was the only age group to see an increase in casualties from 1,212 in 2009/10 to 1,236 in 2010/11 (an increase of 2.0%).

Ten per cent (879) of the casualties in 2010/11 were children aged under 16. Of these 3 were killed, 102 were seriously injured and 774 were slightly injured. This represents a 4.6% decrease on the number of child casualties in 2009/10.

Just under two thirds (65.6%) of all child casualties were passengers, 26.6% were pedestrians and a further 5.9% were pedal cyclists.

There was an increase of 19.6% among child casualties in the under 5 age group, from 158 in 2009/10 to 189 in 2010/11.

## **Definitions**

### **Collisions**

Collisions involving personal injury occurring on the public highway (including footpaths) in which a vehicle is involved. Collisions are categorised as either 'Fatal', 'Serious' or 'Slight' according to the most severely injured casualty.

### **Killed**

Died within 30 days from injuries received in a collision.

### **Serious Injury**

An injury for which a person is detained in hospital as an 'in-patient', or any of the following injuries whether or not the person is detained in hospital: fractures, concussion, internal injuries, crushings, burns, severe cuts and lacerations or severe general shock requiring medical treatment.

### **Slight Injury**

An injury of a minor character such as a sprain, bruise or cut not judged to be severe, or slight shock requiring roadside attention.

### **Casualty**

A person who sustains a slight, serious or fatal injury.

### **Children**

Persons under 16 years of age.

### **Drivers of motor vehicles**

Drivers of hackneys, cars, motor caravans, LGVs, HGVs, cars used as taxis, minibuses and buses.

### **Motorcyclists**

Drivers/riders of mopeds and motorcycles. Includes riders of two-wheeled motor vehicles, motorcycle combinations, scooters and mopeds.

### **Pedal cyclists**

Drivers/riders of pedal cycles. Includes children riding toy cycles on the carriageway and the first rider of a tandem.

### **Passengers**

Occupants of vehicles other than the driver or rider. Passengers of hackneys, cars, motor caravans, LGVs, HGVs, cars used as taxis, minibuses, buses and pedal cycles.

### **Pillion passengers**

Passenger on a moped or motorcycle.

### **Other road users**

Drivers and passengers of invalid/3 wheelers, tractors, ridden horses, other motor vehicles and other non motor vehicles.

## **Pedestrians**

### Include

- Children on scooters, roller skates or skateboards;
- Children riding toy cycles on the footpath;
- Persons pushing bicycles or other vehicles or operating pedestrian-controlled vehicles;
- Persons leading or herding animals;
- Occupants of prams or wheelchairs;
- People who alight safely from vehicles and are subsequently injured;
- Persons other than cyclists holding on to the back of a moving vehicle;
- Persons pushing or pulling a vehicle.

Note: These are the first annual stop and search figures to incorporate data compiled on STOPS, an integrated database designed to capture stop and search information. STOPS was launched on the 1<sup>st</sup> November 2010 and only permits the primary reason for each search to be recorded. From the 1<sup>st</sup> April to 31<sup>st</sup> October 2010, multiple reasons for a stop and search could be recorded. As a result of this change, care should be taken when comparing the figures by reason from April to October with those from November to March.

<sup>1</sup> Arrests as a result of search

<sup>2</sup> As the recording system for PACE stop and search, the number of stop/ searches by reason recorded for April to October does not sum to the total number of persons stopped/searched for these months. Similarly the total arrests by reason for this period will not add up to the total number of persons arrested.

## **Police and Criminal Evidence (PACE) Order: Article 6 Road Checks**

- There were 35 road checks authorised in 2010/11,
- 32 were for the purpose of ascertaining whether a vehicle was carrying a witness to an indictable offence.
- The remaining 3 were for the purpose of ascertaining whether a vehicle was carrying someone reasonably suspected or intending to commit an indictable offence.

**Table 7.2: Police and Criminal Evidence (PACE) Order – Detention Statistics 2010/11**

	Arrests Under PACE			Requests	
	Totals	Gender		Friend/Relative etc	Solicitor
		Male	Female		
Quarter 1 April-June	6,973	6,032	941	1,548	3,215
Quarter 2 July-September	7,195	6,207	988	1,544	3,417
Quarter 3 October-December	6,542	5,657	885	1,547	3,150
Quarter 4 January-March	6,211	5,399	812	1,398	3,150
	<b>26,921</b>	<b>23,295</b>	<b>3,626</b>	<b>6,037</b>	<b>12,932</b>

Extended Detention: During 2010/11 there were 41 persons who were detained in police custody for more than 24 hours and released without charge.

Magistrate's Warrants: There were 32 applications to Magistrates Courts for warrants of further detention, all of which were granted. Seven of these applications were for 24 hours or less while the other 25 were for a period of 36 hours. Of the 30 persons subject to a warrant of further detention, 14 spent less than 24 hours under its authority while 14 spent between 24 hours and 36 hours. The remaining 2 persons had a second extension granted and as a result were detained over 36 hours under the authority of these warrants. 25 persons were subsequently charged.

Intimate Searches: There were two intimate searches carried out by a suitably qualified person during 2010/11. These were drug offence searches of which one uncovered drugs while the other proved negative.

X-rays & ultrasound scans: During 2010/11 there were:

- a) Four x-rays authorised (all negative results)
- b) Four ultrasound scans authorised (all negative results)

**PSNI POLICING DISTRICTS  
FROM 1<sup>ST</sup> APRIL 2007**

**BELFAST**  
**A District** covers North and West Belfast  
**B District** covers East and South Belfast
